

PRODUCT DETAILS

HEIGHT ADJUSTABLE DESK

Overview

Our Venus Height Adjustable Desks are manufactured for a range of applications. Firstly, the desks are designed to comply with the Disability Discrimination Act, enabling desks to adapt to accommodate wheelchair users at the push of a button. Furthermore, the desks enable ICT workstations to adjust for multiple age groups, or simply adapt to achieve a single user's preferred working height. Each desk operates electronically and is able to adjust from a height of 720mm to 1210mm.

When ICT requirements are desired, the desks can be integrated with our computer enclosures and monitor brackets to create a secure, functional ICT workspace. The desks' robust steel frames are able to take the weight of heavy computer equipment, whilst in-built cable trunking and worktop ports enable straightforward cable management.

Features

- Desk height adjustable from 720mm to 1210mm
- Electric height adjustment with quiet motorized function
- Optional computer cage protects ICT devices against theft
- Worktops are supplied with a depth of 25mm to 40mm
- Steel construction

Benefits

- Equality Act compliant, accommodates wheelchair users and a variety of height requirements
- Optional universal mount accommodates screen sizes up to 19" wide
- Supports ICT and non-ICT activities
- Bespoke design service available

Bespoke Service

As each of our desks are designed and manufactured in-house, we are able to offer a unique customisation service that ensures each product is produced to meet the needs of the workspace in which they are installed. This service includes tailoring the colour, shape and style of the worktop and frame, as well as choosing the level of ICT security that may be required.
