The DeskStore is a secure unit designed for storing, charging and transporting tablets and other portable devices when they are not in use. Created to manage the growing use of portable devices in education and business environments, our desktop solution offers a dependable means for ensuring up to 12 devices remain charged and safe from theft.

The universal design accommodates all major tablet models with a display up to 10" in size that charge via USB.

Available in two specifications to fit varying tablet sizes the desktop unit is equipped with compartments to separate each device, individual USB sockets for charging and is secure with two locking mechanisms; one on the front door and another on the base which can be affixed to the desired location preventing unauthorised access.
