

PRODUCT DETAILS

AVI TOWER

Overview

The AVI TOWER has been designed to minimise the offset from the wall whilst providing significant rack / PC storage within its frame. The AVI TOWER is supplied in a choice of two carrying capacities, the reinforced version will support all heavier touch screens.

Ideal for the business environment where an aesthetic installation is a priority, extra security is available at extra cost for more complex environments which needs to be specified when ordering.

Features

- VESA mounting pattern 100x100mm - 800x400mm
- 4x 2U of rack space on each side within 2m tall units
- Full cable access
- PC Storage within frame
- Modular construction (standard modules of 1m extension modules)
- Panels that can be configured to suit screen height requirements

Benefits

- Supports all heavier touch screens including 90" x 127kg including the Microsoft Surface Hub.
- Easy access through removable front and side panels
- Wall mounted and self contained for AV/IT equipment
- Can be used alongside collaborative tables for video conferencing
- Improves employee communication on-demand to large groups of staff
