

## PRODUCT DETAILS

# DESKSTORE

### Overview

DESKSTORE is a secure unit designed for storing, charging and transporting tablets and other similar shaped portable devices when they are not in use. Created to manage the growing use of tablets in education and business environments.

Available in two specifications to fit varying tablet sizes, DESKSTORE is equipped with compartments to separate each device, with individual USB sockets for charging and is secure with two locking mechanisms.

### Features

- Storage for up to 12 devices
- Can store 7" and 10" models
- Individual USB powered sockets for each device
- Drill resistant locks

### Benefits

- Unique rack system with special plastic coating provides protection for tablets
- Fully ventilated to prevent overheating
- Latches into security base or use as portable unit
