

PRODUCT DETAILS

LEVITATOR HA

Overview

LEVITATOR is an electronically height-adjustable digital signage trolley suitable for mounting and securing screen sizes up to 60" wide and 110kg in weight. Ideal for classrooms, boardrooms, receptions and office environments, LEVITATOR is available as a standard trolley for conventional screens, or a wider heavy-duty unit for larger, heavier displays.

Each LEVITATOR is integrated with a JUPITER-LITE mounting bracket, which has versatile sliding arms to accommodate the majority of screen types, as well as a strong locking bar to ensure mounted screens are protected against theft. Our trolleys can also be purchased without brackets.

Features

- Mounts screens up to 60"
- Available in dual screen configuration
- Supplied with heavy duty castors
- Supplied with remote control for HA mechanism

Benefits

- Electronically height adjustable to suit all user height preferences
- Integrated cable management and power distribution
- Smooth castors enables easy mobility and movement of the screen
