

## Creating an Blended Learning Environment

### The Brief

In a happy, supportive environment, girls are challenged and encouraged to develop a love of learning, self-esteem and confidence.

With high standards in every area of the

curricular and extra-curricular field, the school facilitates and encourages the girls to strive for excellence wherever their talents may lie and to seek to expand their experiences by taking the opportunities available to them.

Burgess Hill were looking for their Language lab room to be designed with flexible desks to be used for Laptop storage.

### The Solution

TOP-TEC's Versatile Flip-Top Desks have been used throughout the lab room creating a multi-functional workspace for students, transforming from writing space to a fully functional IT station in the matter of seconds.

Striking royal blue worktops were provided with silver edge banding, to create flush, durable work surfaces. Beech vanity panels and side panels form clean lines, and enhances the look of the room. A matching Teacher's Desk completes the installation

### The Benefits

Customised to meet their exact requirements the Versatile Flip-Top Desks designed, manufactured and installed by TOP-TEC provided the solution. As security is an integral part of the desk design the maximum use of room space can be made.

## Key features of Flip-Top Versatile Desk

- Rooms convert from IT suite to standard classroom in seconds
- Secure storage of Laptops or computers, monitors, keyboards and mouse
- Available in single or double units, a range of colours and styles
