Slimline Active Learning Console

10-year
mechanical
warranty

5-year
electrical

The SLIMLINE ACTIVE LEARNING CONSOLE was specifically designed to help integrate AV/IT into smaller learning environments, drastically reducing the footprint of the technical furniture within the space.

Moving away from a traditional 'podium at the front of the classroom' approach, the wall-mounted enclosure helps promote Active Learning methods, encouraging teachers to interact with students rather than being placed behind a stationary lectern.

The space-saving unit features a removable lacing panel, space for a small PC, an aperture for a control panel and a range of colour finishes & branding options.

University of the Arts, London (UAL):

The concept derived from a recent bespoke requirement from University of the Arts London to create an enclosure to facilitate the deployment of AV over IP into smaller lecture theatres and University classrooms.

Features

- Removable lacing panel
- Secure lockable space for a small PC
- Hook on shelving configurations
- Branding options (vinyl, printed or punched)
- Ventilated side panels

Facilitates seamless AV/IT integration

Complete cable management creates an 'all-in-one' solution.

Space saving unit

Helps maximise the use of smaller learning environments

Promotes Active Learning

With increased student teacher engagement
