Experts in AV and IT Integrated Furniture Solutions

TOP-TEC is committed to enhancing learning through the use of technology.

We do this by designing and manufacturing specialist furniture solutions that are tailored to integrate technology that aids in improving learning outcomes.

Who are we?

TOP-TEC strongly believe that technology enhances learning and we develop specialist furniture solutions to enhance the use of AV and IT equipment. We aim to transform your spaces to support collaborative and active learning in today's education landscape.

We pride ourselves on quality
With over 65 years of manufacturing experience, we pride ourselves on our quality and dependable solutions, and make all of our products at our factory in Birmingham, UK.

We consider IT and AV from the start, rather than as an afterthought
As a UK company who design and manufacture in house, we are completely flexible and are always on hand to listen to our customer's challenges and tailor our products to help find a solution.

A trusted partner to over 90% of the Universities in the UK
We believe in building long term relationships and always strive to create products that are built to last and provide value for money for our customers.

Innovation is in our DNA…

Our in-house design and manufacturing teams can tailor our solutions to meet your requirements in full, creating the right solution for you.

We listen to feedback and advice from our customers and design new products based on the challenges and demands of the education market.

Today, TOP-TEC is a market leader in AV & collaborative furniture in the education sector and we're only getting started!

Keeping technology in its place…
Our range of Voyager lecterns were first on the market to feature an innovative side stop and back stop rack shelving system allowing users to secure their AV/IT equipment and still be able to use it with the door locked.

Streamline your installation…
We were the first in the market to offer a removable racking system, allowing the rack to be populated at the integrators premises prior to the lectern being delivered, saving time during the installation process.

What's our story?

Established in 1957, we have a long history of developing innovative solutions and have earned a reputation for going above and beyond for our customers.

Est. 1957

Founded as a steel fabricator, Amington Engineering specialising in industrial solutions.

Where it all began...

1980s

Started making TV stands for large global brands as sister company Dalen Limited.

Manufacturing TV stands

2000s

Started producing AV integrated and secure IT furniture solutions under our TOP-TEC brand, such as lecterns, collaborative furniture and secure workspace furnishing.

Our factory in Birmingham, UK

Today

Market leader of audio visual and collaborative furniture, supplied into over 90% of Universities in the UK and several international Universities.

TOP-TEC

How can we help?

Based in Birmingham in the UK, we employ over 90 people across our offices and factory.

We have built a reputation of going above and beyond the call of duty for our customers and always strive to give the best possible service.

With complete autonomy over the entire process from manufacture through to installation, we can operate as an extension of your team, building a relationship that runs throughout the whole product lifecycle.

Installations across the globe...

Our commitment to a greener future...

We implement eco-friendly practices to reduce environmental impacts from our manufacturing process and contribute to a greener tomorrow.

Core principles
We are committed to reducing our carbon footprint, recycling steel, and increasing the use of sustainable materials in our products.

ISO 14001:2015
We are is ISO 14001:2015 accredited and we work with our supply chain to ensure all worktops are FSC certified.

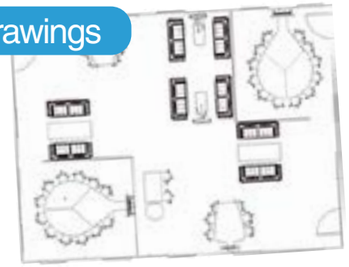

Our Pledge
Net zero emissions by 2047

FREE space planning + consultation service

Our free room planning service enables us to provide you with visualisations of your spaces. We will then supply you with possible solutions for your consideration, including product designs and room-layouts **free of charge and without obligation**.

If you are looking to update existing rooms or have a brand-new learning environment that needs populating, let us do what we do best and help you maximise the potential of your space!

- 3D Renders

customisation

As we design and manufacture all of our products in-house, we are able to provide a unique level of customisation to ensure that your requirements can be met in full.

This may include adapting our mounting equipment to fit your specific device, integrating your brand into our products, or configuring our furniture for your specific IT or AV needs.

If you have a bespoke requirement, call our advisers on **+44 (0)121 783 3838** and we will do our best to create a solution that fits your needs.

Branding

Illuminated Branding

A high-quality laser cut profile backed with an illuminated custom print of your logo so that we can achieve the design and style that you desire.

The location of the branding on each model of lectern is similar with the exact positioning determined by the size and design of the logo to ensure balance and harmony with the unit.

Included in the price:

» Aries
» Gemini
» Contour
» Expert
» Bravo HA
» Bravo Duet
» Starlite

Audio Visual Lecterns

We provide a variety of lecterns as part of our Audio Visual furniture range. Our comprehensive range of AV lecterns are designed to complement all types of room, including small to medium sized teaching rooms, large lecture theatres, agile workspaces, presentation rooms and reception areas.

Facilitates seamless AV/IT integration
Complete cable management creates an 'all-in-one' solution.

Height adjustable (HA)
We offer a range of HA lecterns in which the entire surface rises and falls to match user preference.

Removable rack
Allows rack to be populated at the integrators premises prior to the lectern being delivered.

Secure your AV equipment
Robust steel construction and drill resistant locks provide a high level of security.

Make it your own!
Choose from a wide range of accessories and finishes.

Rack Shelves
Rack shelves are no longer supplied as standard. They remain available FOC on request.

NEW

RO

Veil

Veil is a secure, modular, wall-mounted AV credenza developed to seamlessly integrate technology into contemporary meeting spaces without interrupting the visual or functional flow of the space.

By consolidating AV equipment into a single, ultra-slim wall unit, it removes the reliance on behind-screen installations and reduces visible cabling, creating cleaner, more consistent learning spaces that are easier to manage.

Designed with flexibility in mind, Veil adapts effortlessly to rooms of varying sizes and requirements, supporting a wide range of teaching scenarios. Its minimal footprint preserves valuable wall and floor space, ensuring that technology enhances the environment rather than dominates it.

RO

Gemini (Height Adjustable)

Gemini is a range of electrically height adjustable desk style lecterns in which the entire surface rises and falls to meet the user's preference.

Equality Act compliant, Gemini also features easily accessible secure storage for both rack and non-rack mounted equipment, and is supplied with a versatile monitor arm. Its ergonomic design provides a spacious surface and is ideal for both seated and standing presentations in all room sizes.

Gemini's modular design makes it easier to transport and install. Gemini also comes with our innovative 19" removable rack system that allows the integrator to populate the lectern whilst the main unit is being configured, thus resulting in reduced lead times. Gemini is supplied with illuminated branding as a standard feature.

Aries

ARIES is a stylish presentation lectern that features a height adjustable area that can be adjusted to suit your working angle or be fixed flat or angled at 15° (bespoke angles on request).

Equality Act compliant, ARIES incorporates 16U or 32U rack space, half the rack open as standard and our removable racking system that allows the integrator to pre-fit their AV/IT equipment prior to full installation.

With its ergonomic design and modular construction, ARIES also features internal cable management and an articulated monitor arm for an excellent user experience.

RO

Contour

Contour is a prestigious lectern, available in a large range of sizes to suit all room types. Designed to securely house media equipment, it is available with 16U or 32U rack space as standard, and 12U or 24U / 14U or 28U configurations on request.

Contour is also supplied with a versatile monitor arm, illuminated branding and our innovative rack unit that allows non-rack mounted equipment to be secured within the rack space. The number of U's open on a door is customisable but standard configuration is for half the U's to be open and half closed.

The Contour range features easy equipment access for maintenance, a large storage space, effective cable management and a removable rack system that allows media equipment to be installed at integrators premises while the lectern is still being built.

RO

Expert

EXPERT is a contemporary styled lectern designed to enhance any presentation space. Designed to securely house integrated media equipment, it is suitable for all room sizes. With a removable rack system and illuminated branding, EXPERT is another premium quality offering to suit particular interior designs. It is available with 16U or 32U rack space as standard.

EXPERT incorporates our innovative 19” secure rack unit, that allows non rack-mounted equipment to be fitted and secured within the rack space. The four door access design also allows unrivalled access to the racking system. Modesty panels are included in the price when part of the standard configuration.

Starlite

The Starlite Presenter is a mobile height adjustable presentation station with an inclined or flat work-surface, designed to accommodate two visualisers so that the user may easily switch between media or present multiple items simultaneously. Our visualiser housing for the Starlite features an aperture for a confidence monitor, allowing the lecturer to easily keep track of what is being displayed without the need to divert their attention from the audience.

The unit can be customised to suit the needs of the user with a custom control panel housing and a choice of glass or ceramic writing surface inlays. The additional 2U of top-loading full width storage allows for equipment to be securely concealed.

Cable Raceway

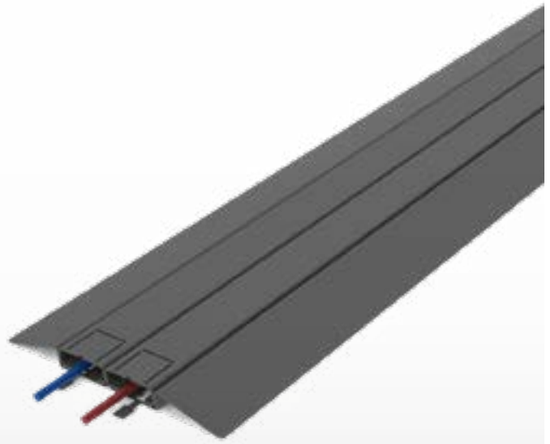

D

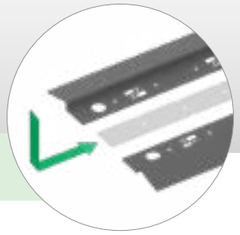

Cable Raceway is a cable management system that incorporates multiple channels for separation of power and data.

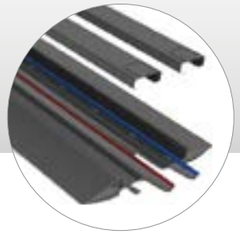

Built to withstand the demanding requirements of modern offices and locations with heavy traffic; its top loaded design brings an end to awkward cable runs. We recommend that the Cable Raceway should be fixed to the floor for a better quality installation.

Cable Raceway uses interlocking modular components to help keep cables tidy, protected and free from damage.

Black colour finish as standard

Cable Raceway has been designed to be modular, enabling you to easily add additional cable channels through the use of width extensions.

Writing Capture Surfaces

Glass or Ceramic Inlay

Our glass and ceramic inlaid surfaces help make your presentation space more effective, enabling you to write directly onto the worktop or present your work on the screen utilising visualiser technology. Choose your finish to optimise visualiser quality on the presentation screen.

Please note:
- Wet wipe is a surface for a "damp" not "wet" cloth.
- If below 20% gloss you will experience fewer reflection issues.

Audio Visual Lecterns

» Our write-on surfaces for lecterns, coupled with an appropriate visualiser, allow you to effectively display content through projection equipment on the fly.

Synergy

» Use these surfaces for collaboration and sharing without printing and distribution.

» Collaborative meetings are easily documented using modern technology; brainstorm, take notes and other details you usually write on a notepad.

» Facilitate your digital document management system by using furniture that allows meeting notes and ideas in the office to be shared, scanned and stored electronically.

» Whether you are presenting notes via visualiser to the screen, writing on the fly, annotating physical items or simply avoiding printing endless copies, the advantage of a quality-writing surface is self evident.

Audio Visual Lecterns & Collaborative Tables

CODE	DESCRIPTION	PRICE
ILP-G	Glass Inlay - Dry Wipe	£885
ILP-CD	Ceramic Inlay - Dry Wipe	£585
ILP-CW	Ceramic Inlay - Wet Wipe	£585

- Smaller and larger sizes available POA up to a certain size
- Inlay panel sizes are made according to customer requirements
- Grid markings are available at additional cost

Desktop Machining

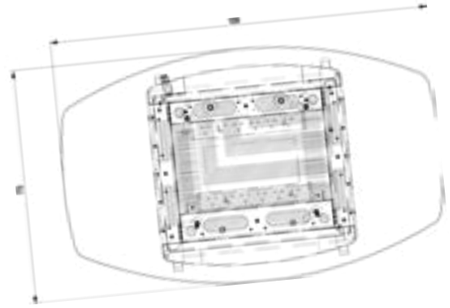

We offer a Desktop Machining service on all lecterns that is completely customisable to your requirements, ensuring the consistency of hole sizes and locations. This service reduces disruption and dust on site or in rack build environments.

We have desktop templates available for all of our products where this service is offered. We need an approved layout in order to proceed.

We can work from CAD (preferred) or an annotated PDF image.

Delivery lead time for Desktop Machining is 10 working days from sign off to delivery date. Sign off notice shorter than this will lead to potential delays, please discuss with your account manager prior to your order.

CODE	PRICE
DESKTOP-MACHINING	£201 per desktop

Additional Option - Desktop Machining & Underside Integrated Cable Channel

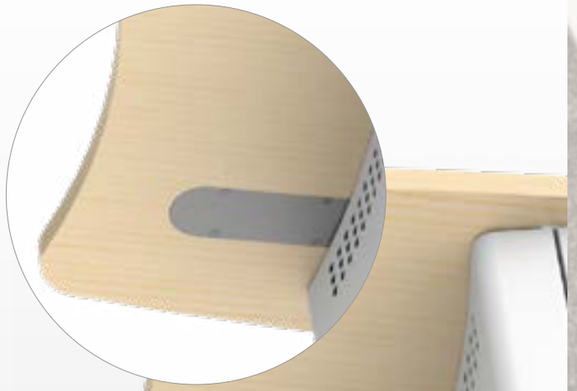

(Only available in combination with Desktop Machining)

With our in-house machining service, we also offer the option to integrate wiring into the worktop using cable channels.

This improves cable management for overhanging worktops allowing power and data leads to connect straight from the body of the lectern to the device without leaving any trailing cables.

For more information, please don't hesitate to contact a TOP-TEC sales advisor.

CODE	PRICE
DESKTOP-MACHINING-ICC	+ £201 per desktop (Additional cost to Desktop Machining)

RO

Neptune Rack Cabinet

Neptune Rack Cabinet is a secure, patented media mounting unit offering superb storage and functionality for AV equipment. The cabinet features an innovative shelving system that has adjustable side stops to prevent the media equipment from moving around and are kept secure with high quality security locks.

There is a removable mounting plate for power distribution and has half of a rack unit open for user access as standard. The user has the option to fix the unit to the wall or floor or to have the cabinet mounted on castors, at an additional cost.

Collaborative Furniture

Collaborative tables allow users to come together for group projects and discussions where they can share information and ideas seamlessly. TOP-TEC builds furniture that seamlessly integrates technology to create innovative collaborative areas and agile working environments.

Collaboration is key!
Creating active learning environments to enhance student collaboration.

Communicate & share ideas
Our table shapes help promote discussion and enhance engagement.

Make it your own!
We can colour match to meet any of your branding requirements.

Tamper proof solution
Keep cables locked away, eliminating any potential tampering.

Facilitates seamless AV/IT integration
Complete cable management creates an 'all-in-one' solution.

Range of models
Our tables range from 2-seat huddles to 20-seat boardrooms.

ROE

Synergy Fusion

Synergy Fusion is a flexible solution designed to give the user the ability to create different learning environments to suit their teaching style on the day. The unit can be used as a traditional display while the screen is raised and can also be retracted when it is not needed, providing clear line of sight for students.

Synergy 'Sit-Stand'

ROE

Our Synergy Collaborative Tables are available with a fully height adjustable worktop where the whole surface rises and falls to suit user preference.

The height adjustable functionality allows users to choose between traditional meetings at seated height typically with a longer duration, or at standing height, encouraging quick touchdown and breakout meetings.

Bespoke designs available

Equality Act compliance

Synergy Folding

ROE

Synergy Folding is highly effective where space is at a premium, room use is varied and multi-use changeover times need to be short.

The table is easily converted into a mobile item in less than three minutes and fits through a standard door when folded.

Synergy Folding is available in Blade, Quad, Plectrum & Reverse Plectrum worktop shapes. Please ask for guidance.

Data Interface Plates

Through our HDMI switch, you may choose to mix and match connections such as **USB C, Mini DisplayPort** and **HDMI**, see example configurations below.

CODE	PRICE
SY4DIP-STD	£366

Illustrated: Cable Connectivity (via a cable well)

Mast:

- 4x USB 3.0 for PC
- 4x HDMI
- 1x 13A socket

- HDMI switcher
- Infrared sensor + remote

Example options are:

1x HDMI input available for wireless display device or on-board PC

Cable well:

Connections in the cable well:

- 3x HDMI
- 1x Mini Display Port (DP)

Connections in the mast:

- 1x 13A socket
- 4x USB 3.0 for PC

- HDMI switcher
- Infrared sensor + remote

Bespoke Data Interface Plates

If you have specific connectivity requirements for your SYNERGY, we offer a bespoke service to meet them. Additionally, we can customise labels to match your branding with our in-house service.

CODE	PRICE
SY4DIP-SP	£366

Make it your own!

Mix & match to create your own solution:

- HDMI
- MiniDP
- Wireless displays
- USB 3.0
- 13A socket

We also accommodate international power & data inputs

Integrate your control panel

As we manufacture ALL of our SYNERGY solutions in-house, we are able to integrate a wide range of control panels into the mast:
(Extron, Crestron, AMX etc.)

A blank canvas...

We can integrate virtually anything into our SYNERGY worktops such as cable retractors, microphones, writing surface inlays etc. Let us know what you need and we will see what we can do to meet your requirements!

Additional cost options...

Replace up to 4 of the standard cable well connections with the following:

USB Type C

DIP-UG-USBC	+ £107 uplift (each)

Lightning (+ charge)

Includes original Apple adapter

DIP-UG-LC	+ £271 uplift (each)

ROE

Focus Pod

Focus was designed to adapt and enhance the ever-changing workspace. This is a collaborative solution that can be placed in an open plan area to create an instant meeting space for a small group of people.

These booths, incorporating pod seating, help limit external office noise, encouraging collaboration between users by creating confidential meeting spaces with effective acoustics.

This unit has been designed with a collaborative table fixed to the sleek media unit which features a encapsulated screen. Focus allows people to collaborate, develop and share work seamlessly.

Screen Trolleys & Stands

TOP-TEC have designed a range of mobile, static and wall mounted display solutions that can be fully integrated with AV and IT equipment.

Our screen trolleys provide the ideal solution for managing and supporting multi-media equipment, able to mount the majority of large screens and facilitate the seamless integration of AV/IT equipment.

Whether it's enhancing your corporate identity, providing wayfinders for visitors or providing an interactive, engaging meeting solution, our screen stands offer a simple, but powerful way to display information in focused areas.

Make it your own!

We can meet any colour option requirements to match your branding.

Tamper proof solution

Keep cables concealed, eliminating any potential tampering.

Facilitates seamless AV/IT integration

Complete cable management creates an 'all-in-one' solution.

Rise [D]

Create flexible learning environments

Ideal for flexible learning
Choose to use the screen up or concealed when not in use..

2x 1U rack space
Allows rack mounted equipment to be integrated behind the screen and in the lower section of the unit.

AV/IT integration
Complete internal cable management creates an ‘all-in-one’ solution.

Screen rises from the base

RISE is a flexible learning solution designed to give the user the ability to rearrange classrooms on the fly and create different learning environments to suit their teaching style on the day.

The unit can be used as a traditional display while the screen is raised and can also be partnered with flexible desks for collaborative group work. The screen can be retracted when it is not needed, providing clear line of sight for students.

Adapt HA

D

ADAPT is available with either electric or manual 'Gravity' height adjustment.

Electric height adjustment allows the screen to be adjusted at the push of a button, whilst 'Gravity' height adjustment allows the screen to be effortlessly raised and lowered manually by the user.

ADAPT HA also enables Equality Act compliance within any learning space, accommodating all user height requirements.

Digital Signage Stand

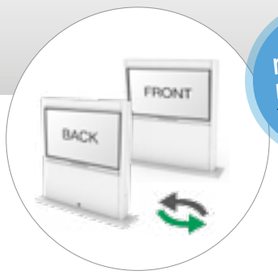

D

The Digital Signage Stand is an elegant effective housing for both screens, PCs and other AV/IT equipment. The free standing screen enclosures can be finished to suit any brand style, including illuminated, printed or vinyl branding.

Designed to be used for displays in meeting and public areas or as internal information points, these stands allow for large screens to be strategically placed wherever they may have the most impact.

Ideal for use in meeting rooms where tamper proof installation is required.

Screen Brackets, Monitor Mounts & Peripheral Security

We supply a range of brackets and mounting kits for screens, monitors, tablet mounts and other accessories.

We offer a range of JUPITER screen mounts, ranging from universal screen mounts to extending screen mounts for all screen weights. These screen mounts are designed to accommodate the full range of different screen sizes.

LockIT

LOCKIT is a secure cabinet perfect for storing your peripheral items such as microphones, remote controls and presentation clickers, helping protect your investment and keeping your equipment safe from theft and tampering.

Its compact design allows the user to fix the unit on top of or beneath a desk, with its side or rear face fitted directly to a wall, or the unit can be stacked or bolted together in rows.

Secure your investment

Manufactured from steel with heavy duty code locks included as standard to safely store your equipment.

Colours & Finishes

Here at TOP-TEC, we offer a range of standard colours and worktop finishes for all of our products at no additional cost, as well as a wide variety of non-standard options on request.

Our in-house powder coating process enables us to match any requirement you may have when it comes to colour.

Offering this service in-house enables us to be extremely flexible when taking into account predetermined colour schemes, company brand colours, and guidelines set by architects and interior designers.

Please let us know what your requirements are and we will work closely with you to achieve your desired outcome.

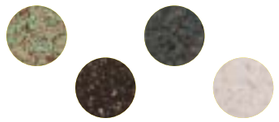

Recycled Worktops

In line with our dedication to sustainability, we have introduced an sustainable worktops manufactured with 100% recycled materials such as plastic, wood and building materials such as concrete and plaster.

This marks a significant stride in our commitment to eco friendly practices, as we continually strive to offer cutting edge solutions that not only meet your technological needs but also contribute to a greener and more sustainable future.

Choose from a wide range finishes...

Wood, Concrete & Plaster

Plastic

Colours & Finishes

Customised colours, finishes and worktop materials to match specific interior design or technical requirements can also be supplied.

TOP-TEC products are available in a range of standard colours and finishes at no additional cost. If your colour is not shown please ask, we may still be able to provide it without additional cost.

Worktops & Edge Banding

fsc fsc international

Worktop Options - AV Integrated Furniture

Worktops are available in seven standard colours and finishes.
A wide range of other colours and materials can be supplied to match your interior and corporate design at extra cost. Please contact us to discuss your requirements.

- » Worktops are supplied with a thickness of between 25mm and 40mm.
- » Warwick Neptune and Media Cabinets are supplied with a melamine faced MDF 18mm worktop with a lacquered edge.

Edge Banding Options - AV Integrated Furniture

Worktops are supplied with durable edge banding in one of seven styles. We can also match other edge band finishes but we recommend standard edge banding as a more durable finish.
