

VEIL | DO MORE WITH LESS

Veil is a secure, modular, wall-mounted AV credenza developed to seamlessly integrate technology into contemporary meeting spaces without interrupting the visual or functional flow of the space.

By consolidating AV equipment into a single, ultra-slim wall unit, it removes the reliance on behind-screen installations and reduces visible cabling, creating cleaner, more consistent learning spaces that are easier to manage.

Designed with flexibility in mind, Veil adapts effortlessly to rooms of varying sizes and requirements, supporting a wide range of teaching scenarios. Its minimal footprint preserves valuable wall and floor space, ensuring that technology enhances the environment rather than dominates it.

Designed for modern teaching environments
Modular design supports learning spaces of any scale.

Effective cable management
Fully enclosed cable management for tamper proof AV.

Minimal footprint
Slim design helps to maintain clear, uncluttered teaching spaces.

Integrated into the space, not imposed upon it
Veil mounts over sockets and under screens to work with your space.

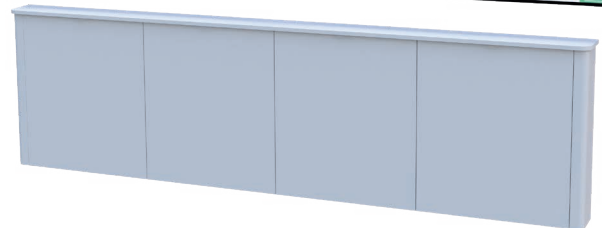

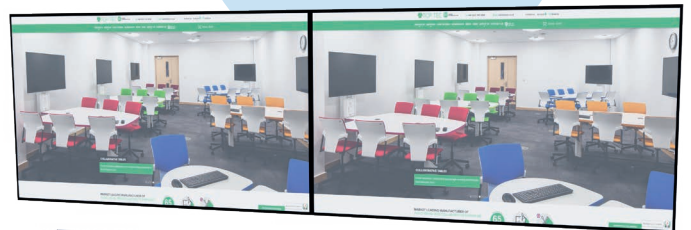

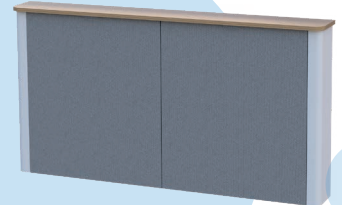

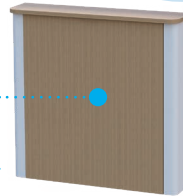

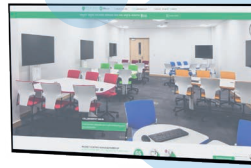

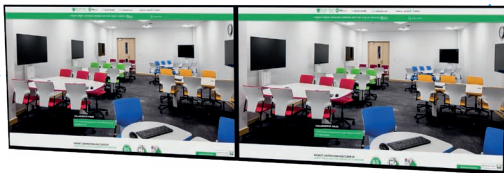

Simple access, straightforward maintenance
Front access panels make it easy for AV & IT teams to access & maintain.

FLEXIBLE BY DESIGN

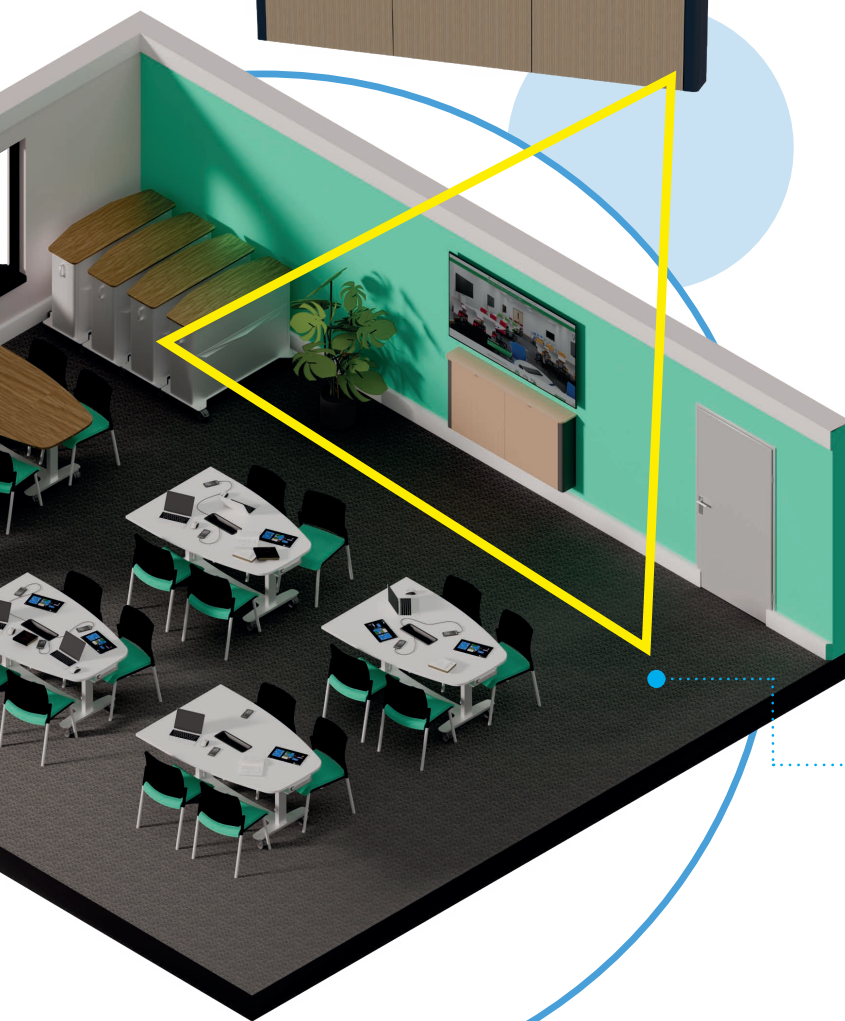

With modular 1 - 4 (or more) bay configurations, Veil can be scaled for multiple rooms while maintaining a consistent user experience.

Get in touch and we'll specify our kit to your exact requirements

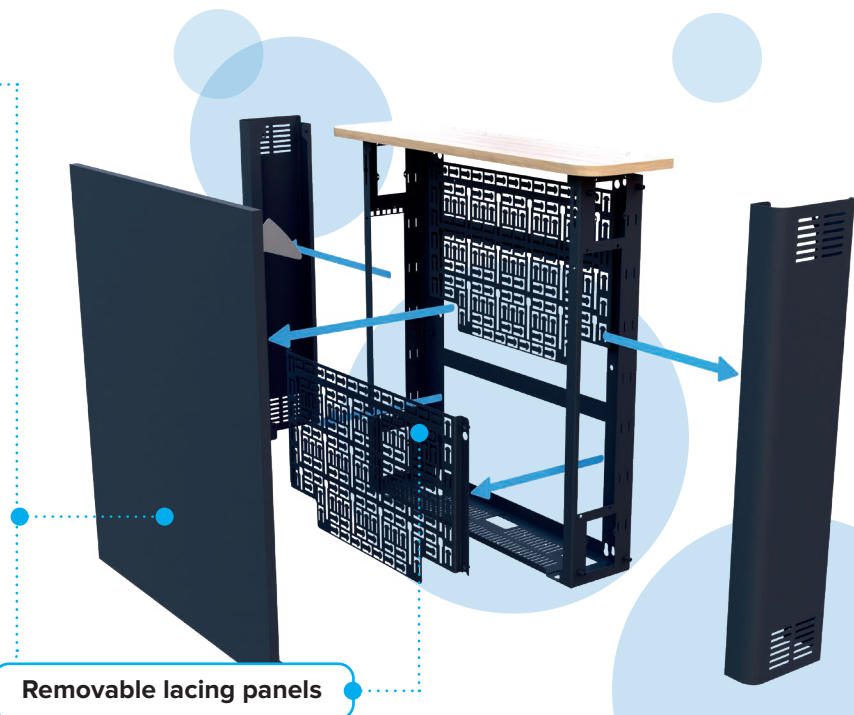

INTEGRATED INTO YOUR SPACE

Veil works with existing room layouts and fits around existing infrastructure, reducing visual impact and allowing technology to support teaching without dominating the environment.

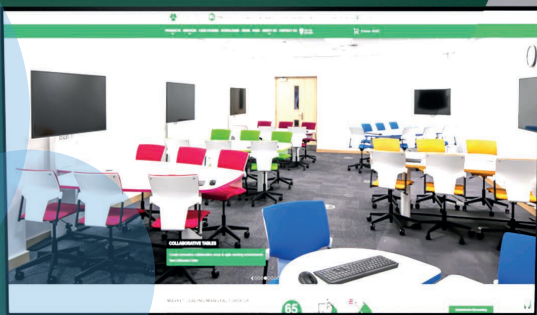

SIMPLE ACCESS, STRAIGHTFORWARD MAINTENANCE

Ease of access to the front, 2U side access and included removable lacing panels make it simple for AV and IT teams to layout, access and maintain equipment.

MAKE IT YOUR OWN

Veil is designed to conceal and limit the impact of AV technology on your space. Why not tailor it to do just that?

ACOUSTIC PERFORMANCE

Make meeting rooms work harder with Veil's optional PET Felt acoustic panels. Designed to help absorb sound and reduce unwanted reverberation, these panels can improve speech clarity and create a more comfortable environment for meetings and collaboration.

Models

Name	Code
Veil - 1 bay	VL1/1B
Veil - 2 bay	VL1/2B
Veil - 3 bay	VL1/3B
Veil - 4 bay	VL1/4B
