

Veil | DO MORE WITH LESS

Veil is a secure, modular, wall-mounted AV credenza designed to house and conceal technology within contemporary meeting and learning environments. It's slim profile brings AV equipment together in one accessible location, without compromising the appearance or functionality of the room.

By consolidating AV equipment into a single, ultra-slim wall unit, it simplifies maintenence and reduces visible cabling, creating cleaner, more consistent spaces that are easier to manage.

Designed with flexibility in mind, Veil adapts effortlessly to rooms of varying sizes and requirements, supporting a wide range of scenarios. Its minimal footprint preserves valuable wall and floor space, ensuring that technology enhances the environment rather than dominates it.

TOP-TEC

Specifically designed for meeting environments

Modular 1-4 bay configurations, with larger installations available.

Simple access, straightforward maintenance

Front access panels make it easy for AV / IT teams to maintain equipment.

Minimal footprint

Slim, wall-mounted design keeps floors clear and minimises visual clutter.

Integrated into the space, not imposed upon it

Sits beneath displays and accommodates existing power and data connections.

Effective cable management

Fully enclosed cable management for tamper proof AV.

TOP-TEC

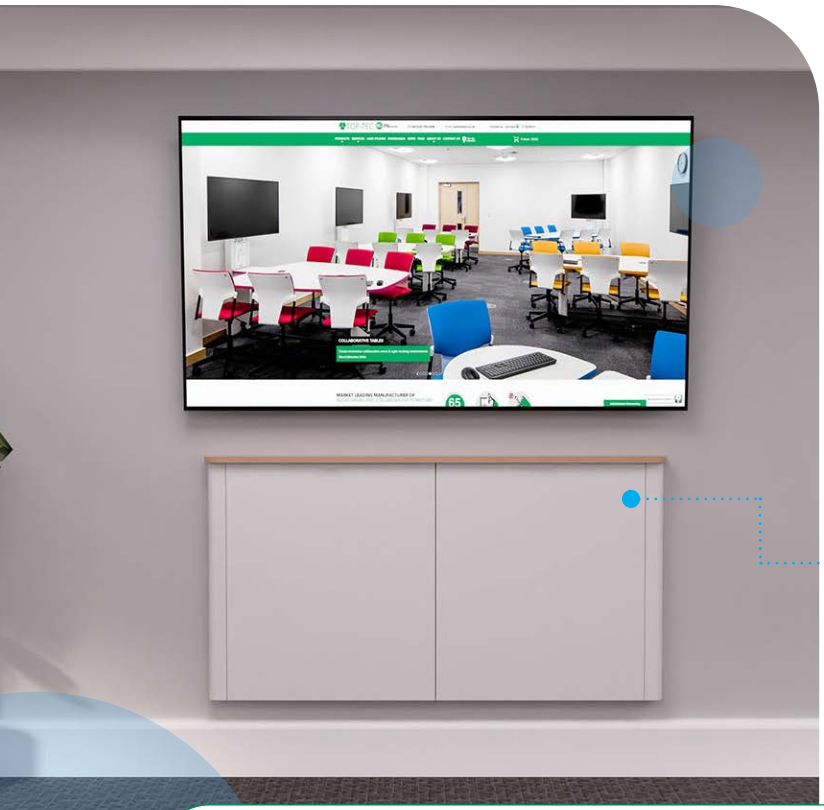

FLEXIBLE BY DESIGN

Veil's modular design offers configurations from 1-4 bays, with larger arrangements available on request. Whether installed in a small meeting room or a larger collaborative space, Veil delivers a consistent appearance while accommodating different AV requirements.

INTEGRATED INTO YOUR SPACE

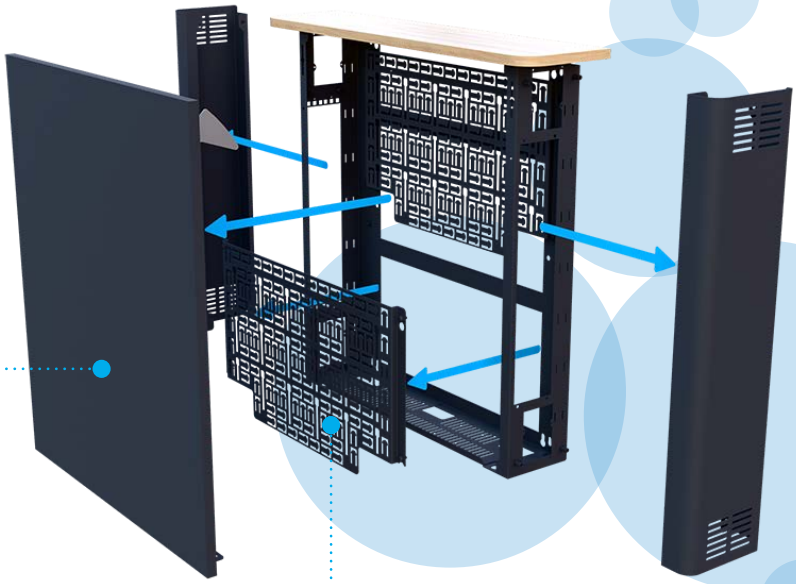

Designed to work with your existing room layout, Veil can be positioned beneath displays and over suitable power and data outlets. Its wall-mounted design keeps equipment accessible while reducing the need for visible cabling and separate AV enclosures.

TOP-TEC

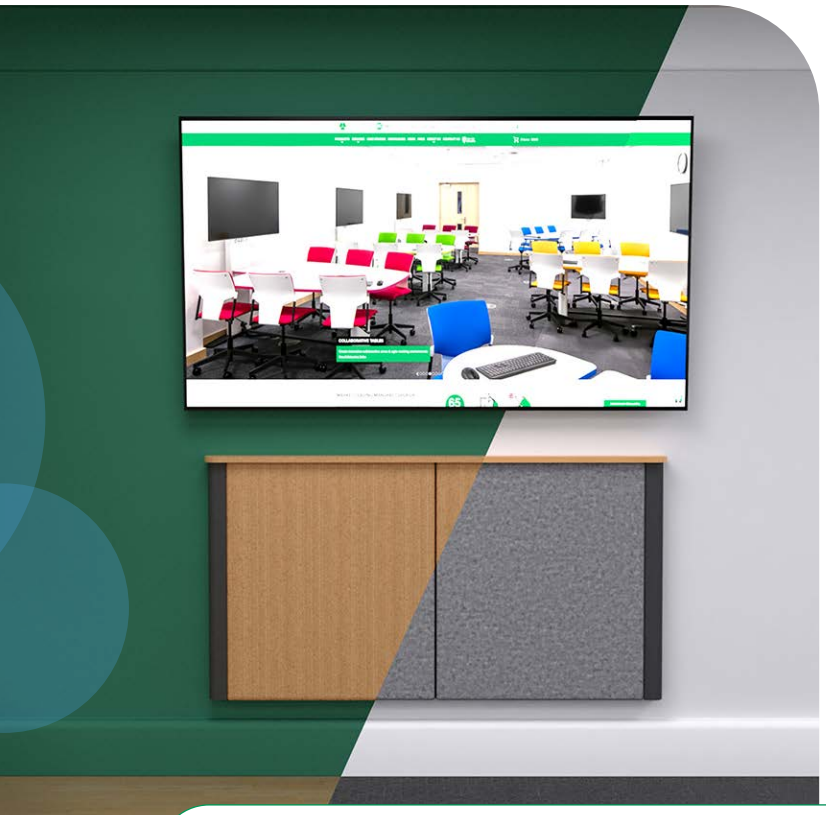

SIMPLE ACCESS, STRAIGHTFORWARD MAINTENANCE

Lockable front panels, side access and removable cable lacing panels make installation and maintenance straightforward. With 2U rack-mounting capacity per bay, Veil keeps equipment organised and readily accessible to AV and IT teams.

MAKE IT YOUR OWN

From steel and natural wood finishes to colourful Acoustic Felt panels and fabric options, Veil can be tailored to complement your interior design.

ACOUSTIC PERFORMANCE

Acoustic Felt panel options help absorb sound and reduce unwanted reverberation.

Class D, αw 0.30

Tested to ISO 354 with the board fixed flat on a rigid backing, rated to ISO 11654. NRC 0.40 is our calculation from the lab's results.
